

Daniela Paola Chanta Rodas

M2 Data Science Student | Machine Learning | Statistical Modelling

Orsay, France | daniela-paola.chanta-rodas@polytechnique.edu | [LinkedIn](#) | [GitHub](#)
Seeking a six-month Data Science internship from April 2027

Education

École Polytechnique, Institut Polytechnique de Paris	2026–2027
M2 Data Science	Palaiseau, France
Télécom Paris	2025–2027
Engineering double-degree programme; Signal Processing & AI (SPAI) and Economics (MODS) tracks	Palaiseau, France
Relevant completed coursework: Machine Learning, Deep Learning, Statistics, Time Series, Optimization, Text Mining.	
Universidad Nacional de Ingeniería	2020–2025
Electronic Engineering. Ranked first in the programme.	Lima, Peru
Relevant coursework: Machine Learning and Data Mining, Probability and Statistics, Linear Algebra, Numerical Methods.	

Experience

ALSI Perú S.A.C.	Lima, Peru
AI Application Developer (contractor)	July 2026
- Built a Zoho Cliq assistant with FastAPI, OpenAI API and Zoho Creator to create and assign commercial leads, with user confirmation. - Built an AI-assisted taxi expense validation workflow in Zoho Creator and FastAPI to process submitted receipts and support reimbursement checks.	
Application Engineer	Jan–Jul 2025
- Built Zoho Creator apps for four business departments and Zoho Analytics dashboards from their operational data. - Prototyped chiller fault detection and diagnosis with a hybrid Random Forest–Neural Network–SVM model.	
Building Automation Engineering Intern	Nov 2023–Dec 2024
Integrated Minew sensors, Azure IoT Hub and Stream Analytics for HVAC monitoring and control, with a Node-RED dashboard.	
University of Alberta — Research Intern	Feb–May 2024
Edmonton, Canada	
- Built and validated a fully automated Python quiz application on MecSimCalc for Mechanical Engineering students, generating personalized assessments and immediate feedback. - Processed rooftop images with OpenCV and scikit-image for a photovoltaic placement optimization app on MecSimCalc.	

Selected Projects

Speculative Dynamics in AI-Related Stocks	Télécom Paris, 2026
Python, time series, financial data, statistical testing	
- Analysed AI stock portfolios and AI-hype indicators from Google Trends and SEC filings. - Used ADF and GSADF tests to detect explosive price episodes and validated the approach against the dot-com period.	
Hugging Face Dataset Visibility and Market Concentration	Télécom Paris, 2025
Python, Requests, BeautifulSoup, data collection and cleaning	
- Scraped public Hugging Face dataset metadata from discovery rankings and dataset pages using Python. - Analysed downloads and likes by producer, modality and ranking category to study market concentration.	

Technical Skills

Programming and data: Python, pandas, NumPy, SQL, data cleaning, web scraping.	
Machine learning and statistics: scikit-learn, PyTorch, regression, classification, time-series analysis, statistical testing.	
Tools: Git, Azure, BeautifulSoup, MQTT.	

Awards & Scholarships

Eiffel Excellence Scholarship – French Government	2025
Study of the United States Institutes (SUSI) Women Leaders Scholarship	2024
PhawAI Artificial Intelligence Research Congress Scholarship	2024

Languages

Spanish: Native	English: Professional working proficiency	French: B2
